Technical Specifications

MEDIUM PRESSURE CENTRIFUGAL FAN

OBF series are single suction high efficiency and low noise fans. The maximum temperature of the suction fluid should be 80 ° C. In order to work at a higher temperature, modifications to the fan manufacturing are required.

Made of high quality corrosion resistant S355 steel and coated with epoxy paint. Can be made of stainless steel for corrosive and high temperature environments. Fans are radial fans with backward curved blades. It is possible to drive the fan with belt pulley, direct coupling or elastic coupling.

Optionally, it can be manufactured with Ex-Proof feature.

Usage Areas

It is suitable for use in dusty air suction, ventilation, drying, mechanical extraction, dust, sawdust or any kind of ventilation systems with toxic gas systems.

Fan Directions

The centrifugal fan direction must be specified when ordering.

To determine the fan direction, one of the following options is selected when looking from the motor side.

Counter Clockwise 	TR Top Right	TR45 Top Right 45°	LT Left Top	LT45 Left Top 45°
				
	BL Bottom Left	BL45 Bottom Left 45°	RB Right Bottom	RB45 Right Bottom 45°
